In re Application of

GLENN ALBRECHT

Application Number

081 862,610

Filed

MAY 23, 1997

Paper No.

#7

I hereby request access under 37 CFR 1.14(a)(1)(iv) to the application file record of the above-identified ABANDONED application, which is identified in, or to which a benefit is claimed, in the following document (as shown in the attachment):

United States Patent Application Publication No. 6013445, page, \_\_\_\_\_ line \_\_\_\_\_  
United States Patent Number \_\_\_\_\_, column \_\_\_\_\_, line, \_\_\_\_\_ or  
WIPO Pub. No. \_\_\_\_\_, page \_\_\_\_\_, line \_\_\_\_\_

Related Information about Access to Pending Applications (37 CFR 1.14):

Direct access to pending applications is not available to the public but copies may be available and may be purchased from the Office of Public Records upon payment of the appropriate fee (37 CFR 1.19(b)), as follows:  
For published applications that are still pending, a member of the public may obtain a copy of:

- the file contents;
- the pending application as originally filed; or
- any document in the file of the pending application.

For unpublished applications that are still pending:

- (1) If the benefit of the pending application is claimed under 35 U.S.C. 119(a), 120, 121, or 365 in another application that has: (a) issued as a U.S. patent, or (b) published as a statutory invention registration, a U.S. patent application publication, or an international patent application publication in accordance with PCT Article 21(2), a member of the public may obtain a copy of:

- the file contents;
- the pending application as originally filed; or
- any document in the file of the pending application.

- (2) If the application is incorporated by reference or otherwise identified in a U.S. patent, a statutory invention registration, a U.S. patent application publication, or an international patent application publication in accordance with PCT Article 21(2), a member of the public may obtain a copy of:  
the pending application as originally filed.

# United States Patent [19]

Albrecht et al.

[11] Patent Number: 6,013,445  
[45] Date of Patent: Jan. 11, 2000

## [54] MASSIVELY PARALLEL SIGNATURE SEQUENCING BY LIGATION OF ENCODED ADAPTORS

[75] Inventors: Glenn Albrecht, Redwood City, Calif.; Sydney Brenner, Cambridge, United Kingdom; Robert B. DuBridge, Belmont, Calif.; David H. Lloyd, Daly City, Calif.; Michael C. Pallas, San Bruno, Calif.

[73] Assignee: Lynx Therapeutics, Inc., Hayward, Calif.

[21] Appl. No.: 08/946,138

[22] Filed: Oct. 7, 1997

### [57] ABSTRACT

The invention provides a method of nucleic acid sequence analysis based on the ligation of one or more sets of encoded adaptors to the terminus of a target polynucleotide. Encoded adaptors whose protruding strands form perfectly matched duplexes with the complementary protruding strands of the target polynucleotide are ligated, and the identity of the nucleotides in the protruding strands is determined by an oligonucleotide tag carried by the encoded adaptor. Such determination, or "decoding" is carried out by specifically hybridizing a labeled tag complement to its corresponding tag on the ligated adaptor.
